SHOAIB RIAZ

Software Engineering Student | DevOps & Cyber Security

Muzaffargarh, Pakistan | +92 308 8211064 | shoaibriaz8211@gmail.com | LinkedIn: linkedin.com/feed | GitHub: github.com/shoaib389

Professional Summary

Final-year Software Engineering student at MNS University of Engineering & Technology, Multan, with hands-on experience across DevOps, cloud infrastructure and cyber security. Completed a 3-month internship in the AMI Cell at MEPCO Multan and is currently doing a Cyber Security internship at UET Lahore. Cloud Practitioner with practical experience in CI/CD automation, Infrastructure as Code, monitoring and secure system operations. Looking for an entry-level role in DevOps, Cloud or Cyber Security where I can build secure, scalable and automated systems.

Experience

Cyber Security Intern - University of Engineering & Technology (UET), Lahore | Present

- Training and working on practical cyber security tasks under the guidance of the university team.
- Learning vulnerability assessment, network security fundamentals and secure system practices. [Add the specific tools/topics you used, e.g. Kali Linux, Nmap, Wireshark, Burp Suite]
- Applying security thinking to infrastructure and

Intern, AMI Cell - MEPCO (Multan Electric Power Company), Multan HQ | 3 Months [add month/year]

- Worked with the Advanced Metering Infrastructure (AMI) team on enterprise-level IT and operations.
- Gained practical exposure to server configuration, networking, monitoring and data handling in a live enterprise environment.
- Assisted in automating routine tasks and processes using Bash and Python scripts.
- Supported system uptime monitoring and day-to-day operational improvements.

Projects

Automated CI/CD Deployment Pipeline

Built a pipeline using Jenkins, GitHub and Docker for automated build, test and containerized deployment.

Scalable AWS Cloud Infrastructure

Deployed a highly available web architecture on AWS (EC2, S3, RDS, IAM, VPC) managed with Terraform (Infrastructure as Code).

Infrastructure Monitoring Dashboard

Configured Prometheus and Grafana for real-time monitoring of system metrics, resource utilization and alerts.

Hostel Management System (Web-Based)

Developed a web-based application to manage hostel operations such as student records, room allocation and fee tracking. Tech stack: [add technologies used].

Technical Skills

- **Cyber Security:** Network Security Basics, Vulnerability Assessment, Secure Configuration, IAM, Linux Hardening [edit to match what you actually learned]
- **DevOps & Cloud:** AWS, Docker, Kubernetes, CI/CD, Jenkins, Terraform, Ansible, Prometheus, Grafana
- **Programming & Scripting:** Python, Bash Scripting, SQL
- **OS & Databases:** Linux, Bash Scripting, SQL, MySQL, PostgreSQL

Education

B.S. Software Engineering - MNS University of Engineering & Technology (UET), Multan | Expected 2027 | CGPA: [add]

F.Sc. Pre-Medical - B.I.S.E. DG Khan

Matriculation - B.I.S.E. DG Khan

Certifications

- AWS Certified Cloud Practitioner - Amazon Web Services (AWS)

Achievements

- Earned the official AWS Certified Cloud Practitioner credential.
- Completed an enterprise internship at MEPCO Multan Head Office (AMI Cell).

- Selected for a Cyber Security internship at UET Lahore.
